EXHIBIT 6

Denial of Respondent's Ex Parte Application re Child's Whereabouts, filed September 2, 2026

Hyler v. Heller, Mendocino County Superior Court No. 25FL01030 — Declaration of Carli Michelle Heller in Support of Ex Parte Request

(The pages that follow carry the labels they bear in Respondent's earlier filings.)

FILED
09/02/2026
KIM TURNER, CLERK OF THE COURT
SUPERIOR COURT OF CALIFORNIA,
COUNTY OF MENDOCINO
Cantrell, Joseph
DEPUTY CLERK

DENIED, no actual exigency shown. No showing why this should not be brought by noticed motion. Based on this Court's review of the file, the proposed ex parte seeks to circumvent a TECO while disqualification is pending as to judge who issued the TECO.

SUPERIOR COURT OF CALIFORNIA, COUNTY OF MENDOCINO

VINCENT MICHAEL HYLER, Petitioner, v. **CARLI MICHELLE HELLER,** Respondent. Regarding: minor (DOB 9/6/2024).	Case No. **25FL01030 (consolidated with 25FL01032)** **EMERGENCY EX PARTE APPLICATION FOR ORDER TO DISCLOSE MEDICALLY VULNERABLE CHILD'S WHEREABOUTS AND CARE STATUS AND TO APPEAR WITH THE CHILD; DECLARATION OF NOTICE; PROPOSED ORDER (FAM. CODE §§ 3429, 3430; CRC 5.151)**

I. Application

Respondent Carli Michelle Heller — sole physical custodian of the minor Hyler (DOB 9/6/2024), with primary decision-making authority under the Findings and Order After Hearing entered February 11, 2026, temporarily displaced by an ex parte order (FL-305) that expires September 2, 2026 and is under appellate challenge — applies ex parte under California Rule of Court 5.151 for orders under Family Code §§ 3429 and 3430 and the court's inherent authority over the custody of the minor.

The child's location is unknown to his mother. Respondent does not know where her 23-month-old son is. Since the August 19–21, 2026 removal, the child's location has not been disclosed to Respondent by anyone, despite her preserved written requests to Petitioner and his family. The child has neurodevelopmental delays from sustained severe prenatal and postnatal trauma, including a documented sensory processing disorder and retained primitive reflexes, with feeding difficulties; his prescribed twice-weekly occupational therapy and weekly Early Steps feeding session — three prescribed sessions weekly — have been interrupted since the removal. A medically vulnerable toddler whose whereabouts, caregivers, and treatment status
